Japan Credit Rating Agency, Ltd. (JCR) announces the following credit rating.

Meiji Yasuda Life Insurance Company (security code: -)

<affirmation></affirmation>	
Long-term Issuer Rating:	AA
Outlook:	Stable
Ability to Pay Insurance Claims:	AA
Outlook:	Stable
CP:	J-1+

Rationale

- (1) Meiji Yasuda Life Insurance Company is the core company of the Meiji Yasuda Group, one of the major life insurance groups in Japan. It boasts the top share in the group insurance market in Japan. The Group has subsidiaries such as StanCorp Financial Group, Inc. in the U.S. and other companies, and has been diversifying geographic regions and earnings sources, including overseas insurance business. JCR rates the issuer rating of Meiji Yasuda Life at the same level as the Group's overall creditworthiness, which is considered equivalent to "AA" based on the assessment on the strong operating base in Japan, stable earnings power on the back of a large amount of policies in force, high capital adequacy relative to risks, and others. Its strength lies in the stability of its quantitative aspects, such as its business foundation, profit, and capital, and JCR expects it to maintain good levels going forward. The business performance of policies has been strong, and the new business value has been steadily accumulating. Sensitivity of economic value-based indicators has been controlled, partly because the Group has been reducing interest rate risk.
- (2) The Meiji Yasuda Group has a relatively strong market position and competitive edge. It is characterized by provisions of products that have flexibility in terms of combination of coverages (medical, nursing care, disability, etc.) and post-purchase reviews in these coverage in line with customers' life stages. For younger customers, it is developing new customers by launching smallamount life and non-life insurance products. It has also been offering health promotion products and related services, and these efforts have led to an increase in the number of customers (policyholders and others). It has more than 30,000 sales staff, its main channel, which has been stable. In addition to improving treatment and strengthening training, it has been improving its sales techniques using digital technology, and productivity and efficiency, such as retention rate of sales staff and policy persistency rate, are on an improving trend. Sales of core products have been strong, and highquality consulting and thorough after-sales follow-up for policyholders have contributed to curbing the surrender, lapse, and partial surrender rates. With respect to overseas insurance business, StanCorp's business performance of policies has been firm, mainly due to strong performance in the group insurance business. Overseas profits contribute around 15% of the Group's premiums and core profit, and in recent years, the Group has been expanding its business in the US through bolt-on acquisitions, and an improvement in profit levels is expected.
- (3) The Group's earnings power is relatively high and stable. Sales trends of foreign currencydenominated single-premium products, etc. are variable factors, but business performance of policies such as annualized new business premium has been solid. It has secured relatively large mortality gains on the back of its large policies in force, and its core profit has remained stable, with limited downward impact of hedging costs related to foreign bond investments. The policies in force of protection products such as third-sector products are on the rise, and the product mix of in-force policies has been changing. Group surplus has been steadily increasing, and JCR will pay attention to whether this trend continues.
- (4) JCR considers that the Group's capital adequacy is equivalent to the AA range. ESR is sufficiently high to maintain soundness even under considerable stress. Thanks partly to the fact that it has been promoting surplus management-type ALM from early on, economic value-based management and operations have become widespread. It has been reducing interest rate risk by narrowing the duration gap and through cash flow matching, and sensitivity of ESR has been controlled. The importance of global and group-wide ERM has increased, as overseas business has expanded, but JCR believes

 - Please see the news release. If the credit rating is a private rating, please see the report for private rating.
- 3 The Main Assumptions and Principles used in Constructing the Procedures and Methodologies used to Determine the Credit Rating as Required by Paragraph (a)(1)(ii)(C) of Rule 17g-7
 - The credit rating methodology assumes, in principle, to be applied to assess the likelihood of a given debt payment in light of its issuer's condition and business environment, etc. in the relevant future. There is certain limitation, however, in the time horizon that the rating foresees.
 - The credit rating methodology assumes, in principle, that the factors posted in the below are particularly important for such likelihood to be determined, and that the rating determination is made by evaluating each of them not only quantitatively but also employing qualitative analyses.
 - A) Business Bases

1

The likelihood of a given debt payment is highly conditional to its issuer's business bases - how they can be maintained/ expanded into the future and thereby secure earnings and cash flows in adequacy and in a sustainable way.

B) Financial Grounds and Asset Quality

The likelihood of debt payment is highly dependent on the degree of the issuer's indebtedness and loss absorption capacity in terms of equity capital. Also notable is that a financial institution might see a significant loss of financial grounds as a result of changes in value of the assets under its possession.

C) Liquidity Positions

The likelihood of debt payment is highly dependent on the adequacy of the issuer's cash and other sources of repayment (liquidity positions).

D) Related Parties' Status and Stance of Support/ Assistance for the Issuer

The likelihood of debt payment is affected one way or the other by the issuer's related parties such as parent company, subsidiary, guarantor, and the government of the issuer's business domicile, etc. - by their own conditions and/ or position of support/ assistance for the issuer.

E) Order of Seniority in Debt Payment

4

The likelihood of debt payment can be different between given debts of the same issuer. The likelihood of debt payment for an individual debt is dependent on the issuer's discretion, and/ or its rank relative to other debts of the same issuer in the order of seniority in principal/ interest payment which is determined by design as financial product or by laws, etc.

- The Potential Limitations of the Credit Rating as Required by Paragraph (a)(1)(ii)(D) of Rule 17g-7
- The credit rating herewith presented by JCR is its summary opinion with regard to the likelihood of given debt payment and hence not necessarily a perfect representation of such likelihood. The credit rating is not intended to estimate the probability of default or the loss on given default, either.
- The objective of the credit rating herewith presented does not include any concerns other than the likelihood of debt payment, such as risks of price changes, market liquidity, etc.
- The credit rating herewith presented is necessary to be reviewed along with possible changes of the issuer of rated objects in its business performance and/ or circumstances which include regulatory environment, and hence subject to possible alteration.

Also, the changes in the quality of asset under the issuer's holding may affect the credit rating, since such changes could raise or lower the likelihood of future loss of the issuer's financial grounds. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change in the financial grounds and/ or asset quality is large.

The resultant alteration of the credit rating is usually a notch, with possibility of a few notches if and when the change is large.

E) Order of Seniority in Debt Payment and Non-Payment Forgiven by Contract

The credit rating is subject to alteration if there is a change in the rated debt's status in the order of seniority relative to other debts caused by the improvement/ deterioration of the issuer's financial condition. The resultant alteration of the credit rating is usually a notch, with possibility of a few notches if and when the change is large. Also, in case of the financial products for which non-payment of interest/ principal is contractually permissible, the credit rating is subject to alteration if and when the likelihood of such non-payment is projected to increase or decrease.
