24-D-1642 February 3, 2025

Japan Credit Rating Agency, Ltd. (JCR) announces the following credit rating.

### Sanyo Special Steel Co., Ltd. (security code: 5481)

<Credit Monitor Placement> Long-term Issuer Rating: from A+ to #A+/Positive CP: from J-1 to #J-1/ Positive

#### Rationale

- (1) Sanyo Special Steel Co., Ltd. (the "Company") is a specialized manufacturer of special steel that boasts the largest share in the domestic bearing steel market and a consolidated subsidiary of NIPPON STEEL CORPORATION (53.17% voting rights as of March 31, 2024). On January 31, 2025, it was announced that NIPPON STEEL would conduct a tender offer and squeeze-out procedures for the Company's shares. The tender offer period is from February 3 to March 18, 2025, and if NIPPON STEEL is unable to acquire all of the Company's shares through the tender offer, NIPPON STEEL plans to delist and make the Company a wholly-owned subsidiary through a special controlling shareholder's request for sale of shares or a reverse stock split.
- (2) If NIPPON STEEL succeeds in making the Company a wholly owned subsidiary, capital ties between the two companies will be strengthened, and the degree of NIPPON STEEL's control over and involvement in the Company is expected to increase. In addition, it is expected that synergies in production and technology will be demonstrated to a greater extent than before and that the global strategy will be strengthened and the efforts to achieve carbon neutrality will be accelerated. As the probability of support from the NIPPON STEEL Group is expected to increase, JCR has placed the Company's ratings under Credit Monitor with Positive direction. JCR will monitor the progress of the procedures to make the Company a wholly owned subsidiary and reflect that in the rating.

3 The Main Assumptions and Principles used in Constructing the Procedures and Methodologies used to Determine the Credit Rating as Required by Paragraph (a)(1)(ii)(C) of Rule 17g-7

- The credit rating methodology assumes, in principle, to be applied to assess the likelihood of a given debt payment in light of its issuer's condition and business environment, etc. in the relevant future. There is certain limitation, however, in the time horizon that the rating foresees.
- The credit rating methodology assumes, in principle, that the factors posted in the below are particularly important for such likelihood to be determined, and that the rating determination is made by evaluating each of them not only quantitatively but also employing qualitative analyses.
- A) Business Bases

1

The likelihood of a given debt payment is highly conditional to its issuer's business bases - how they can be maintained/ expanded into the future and thereby secure earnings and cash flows in adequacy and in a sustainable way.

B) Financial Grounds and Asset Quality

The likelihood of debt payment is highly dependent on the degree of the issuer's indebtedness and loss absorption capacity in terms of equity capital. Also notable is that a financial institution might see a significant loss of financial grounds as a result of changes in value of the assets under its possession.

C) Liquidity Positions

The likelihood of debt payment is highly dependent on the adequacy of the issuer's cash and other sources of repayment (liquidity positions).

D) Related Parties' Status and Stance of Support/ Assistance for the Issuer

The likelihood of debt payment is affected one way or the other by the issuer's related parties such as parent company, subsidiary, guarantor, and the government of the issuer's business domicile, etc. - by their own conditions and/ or position of support/ assistance for the issuer.

E) Order of Seniority in Debt Payment

4

The likelihood of debt payment can be different between given debts of the same issuer. The likelihood of debt payment for an individual debt is dependent on the issuer's discretion, and/ or its rank relative to other debts of the same issuer in the order of seniority in principal/ interest payment which is determined by design as financial product or by laws, etc.

- The Potential Limitations of the Credit Rating as Required by Paragraph (a)(1)(ii)(D) of Rule 17g-7
- The credit rating herewith presented by JCR is its summary opinion with regard to the likelihood of given debt payment and hence not necessarily a perfect representation of such likelihood. The credit rating is not intended to estimate the probability of default or the loss on given default, either.
- The objective of the credit rating herewith presented does not include any concerns other than the likelihood of debt payment, such as risks of price changes, market liquidity, etc.
- The credit rating herewith presented is necessary to be reviewed along with possible changes of the issuer of rated objects in its business performance and/ or circumstances which include regulatory environment, and hence subject to possible alteration.
- 5 Information on the Uncertainty of the Credit Rating as Required by Paragraph (a)(1)(ii)(E) of Rule 17g-7

- JCR holds its basic policies for securing the quality of information as a base of due diligence for the determination of credit ratings. Also, the changes in the quality of asset under the issuer's holding may affect the credit rating, since such changes could raise or lower the likelihood of future loss of the issuer's financial grounds. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change in the financial grounds and/ or asset quality is large.

The resultant alteration of the credit rating is usually a notch, with possibility of a few notches if and when the change is large.

#### E) Order of Seniority in Debt Payment and Non-Payment Forgiven by Contract
