The Kumamoto Bank, Ltd. (security code: -)

<Affirmation>

Long-term Issuer Rating: AA-
Outlook: Stable

The Juhachi-Shinwa Bank, Ltd. (security code: -)

<Affirmation>

Long-term Issuer Rating: AA-
Outlook: Stable

THE FUKUOKA CHUO BANK, LTD. (security code: -)

<Affirmation>

Long-term Issuer Rating: AA-
Outlook: Stable

Rationale

- (1) The Fukuoka Financial Group (the "Group") is a regional financial group having THE BANK OF FUKUOKA, LTD. ("FUKUOKA BANK"), The Kumamoto Bank, Ltd. ("Kumamoto Bank"), The Juhachi-Shinwa Bank, Ltd. ("Juhachi-Shinwa Bank"), THE FUKUOKA CHUO BANK, LTD. ("FUKUOKA CHUO BANK") and others under the umbrella of Fukuoka Financial Group, Inc. ("FFG") as the holding company. It operates widely in Kyushu, and its total fund volume of 22 trillion yen is largest in the industry. While the four subsidiary banks maintain their own brands in the respective service areas, functions like corporate planning and risk management are concentrated to FFG under the leadership of FUKUOKA BANK. The Group as a whole is improving efficiency by utilizing the common infrastructure. JCR deems the Group's creditworthiness to be equivalent to AA- in consideration of such factors as the solid business base, good earning capacity and decent capital level.
- (2) ROA and RORA based on the Group's consolidated core net business income (excluding gains/losses on cancellation of investment trusts; hereinafter the same) are favorable, standing at around 0.35% and 1.5%, respectively, in the first half of the fiscal year ending March 2025 (FY2024). Core net business income grew nearly 20% over the year in the first half of FY2024 as interest on loans remained steady, and so did net fees and commissions. Short-term fund management with the use of BOJ Current Account, etc. also contributed to this income growth. Looking ahead, loan-deposit spreads are expected to expand further on the back of rising market interest rates. As loans (excluding those to the government, etc.; hereinafter the same) are expected to stay steady thanks to robust demand for funds in Fukuoka Prefecture and semiconductor-related and other industries, JCR assumes that core net business income will remain high.

- (3) Soundness of assets is maintained. Non-performing loans ratio under the Financial Reconstruction Act of the four banks combined is kept low. Reserves are made conservatively, and a conservative provision ratio is adopted for general allowance for loan losses in light of future economic forecasts. Moreover, reserves based on the DCF method are made for the debtors classified in “other debtors requiring caution” or lower categories whose credit exceeds a certain amount. Credit costs have been levelling off, and their ratio has been staying below 10 bps in recent years, when excluding the impact of changes in provision standards. While attention should be paid to the business conditions of local SMEs as borrowers, credit costs will likely remain within a range fully absorbable by core net business income.
- (4) Risks associated with securities investment are not excessive. The Group controls the amount of interest rate risk at a decent level relative to capital by shortening duration. Price fluctuation risk is not excessive, either. The Group’s consolidated unrealized gains on available-for-sale securities as of September 30, 2024 were 15.8 billion yen. Given, among others, that the Group controls its portfolio so that risk amount for each asset type does not exceed a certain level, JCR assumes that risk-taking will not be excessive even in the future.
- (5) The Group’s consolidated core capital ratio adjusted for general allowance for loan losses, etc. as of September 30, 2024 was a bit over 11%. Factors like additional growth investments and the full implementation of the finalized Basel III framework are likely to push down the ratio going forward. However, because retained earnings will also accumulate at the same time, JCR assumes that the capital level comparable to that of other regional banks in JCR’s AA- rating category will be maintained.

Issuer: Fukuoka Financial Group, Inc.

FFG is the financial holding company of the Group. It was established through the joint stock transfer by FUKUOKA BANK and Kumamoto Bank in April 2007. Its Issuer rating is one notch below the Group’s creditworthiness in light of somewhat high double leverage ratio, etc.

Issuer: THE BANK OF FUKUOKA, LTD.

- (1) FUKUOKA BANK is a regional bank headquartered in Fukuoka City, Fukuoka Prefecture with a fund volume of 13.8 trillion yen. It has a solid business base as a leading bank in the prefecture with the share of a bit over 30% for loans. Its issuer rating is deemed to be at the same level as the Group’s creditworthiness in light of such factors as its own core position in the Group.
- (2) ROA and RORA based on core net business income for the first half of FY2024 were a bit below 0.5% and around 2%, respectively, driving the Group’s good profitability. Core net business income has grown sharply in recent years, rising nearly 15% over the year in the same period. Interest on loans remained steady, and an increase in investment income from securities and short-term funds also contributed to this growth. Loans in the prefecture are on the increase. SME lending remains steady, and current growth in loans to individuals is also helping push up total loans. Moreover, fee income from investment trusts and corporate-related transactions are strong.
- (3) Non-performing loans ratio under the Financial Reconstruction Act is kept low in the lower 1% range. Even though it should be noted that the balance of structured finance such as ship finance and real estate non-recourse loans is not small, FUKUOKA BANK conducts disciplined credit management under the strict screening system. As regards risks associated with securities investment, neither interest rate risk nor price fluctuation risk is excessive.

Issuer: The Kumamoto Bank, Ltd.

- (1) Kumamoto Bank is a regional bank II headquartered in Kumamoto City, Kumamoto Prefecture with a fund volume of 1.7 trillion yen. With a 20% share for loans in the prefecture, it ranks second in its locality. Its issuer rating is deemed to be at the same level as the Group’s creditworthiness in light of its strong unity with the Group in terms of business administration and business strategies.
- (2) ROA and RORA based on core net business income for the first half of FY2024 were a bit below 0.3% and around 1%, respectively. Core net business income has been steady, rising nearly 5% over the year in the same period. Loans increased by a bit over 5% as of the end of the first half of FY2024 thanks to robust local demand for funds, etc., and interest on loans grew by nearly 1%. Non-performing loans ratio under the Financial Reconstruction Act stands decent at around 1.5%. Securities-to-deposit ratio is low, and risks associated with securities investment are limited.

Issuer: The Juhachi-Shinwa Bank, Ltd.

- (1) Juhachi-Shinwa Bank is a regional bank headquartered in Nagasaki City, Nagasaki Prefecture with a fund volume of 5.7 trillion yen. It was created in October 2020 through the merger of formerly The Shinwa Bank, Ltd. (Sasebo City) and formerly The Eighteenth Bank, Ltd. (Nagasaki City). It has an overwhelming presence in the prefecture with the share of around 60% for loans. Its issuer rating is deemed to be at the same level as the Group's creditworthiness in light of its strong unity with the Group in terms of business administration and business strategies.
- (2) ROA and RORA based on core net business income for the first half of FY2024 were a bit below 0.3% and just over 1%, respectively. Juhachi-Shinwa Bank achieved drastic cost reductions after the merger partly through a cut in the number of its bases by nearly 40%, and core net business income rose sharply as a result. Helped by growth in interest on loans and investment income from securities and short-term funds even after that, core net business income rose nearly 20% over the year in the first half of FY2024. Loans in the prefecture remain almost flat. Non-performing loans ratio under the Financial Reconstruction Act stands decent at a bit below 2%. As regards risks associated with securities investment, neither interest rate risk nor price fluctuation risk is excessive.

Issuer: THE FUKUOKA CHUO BANK, LTD.

- (1) FUKUOKA CHUO BANK is a regional bank II headquartered in Fukuoka City, Fukuoka Prefecture with a fund volume of 0.5 trillion yen. With strength in SME lending, it steadily holds the share of nearly 2% for loans in the prefecture. Its issuer rating is deemed to be at the same level as the Group's creditworthiness in light of its strong unity with the Group in terms of business administration and business strategies.
- (2) ROA and RORA based on core net business income for the first half of FY2024 were a bit below 0.3% and around 0.7%, respectively. Core net business income remains steady. Interest on loans is weakening, but countermeasures including cost reductions are already in place.
- (3) Non-performing loans ratio under the Financial Reconstruction Act has risen to around 5% from around 3% prior to the merger. Credit costs had been leveling off in recent years but are now climbing sharply, owing largely to the unification of assessment and provision standards following FUKUOKA CHUO BANK's consolidation into the Group. Securities investment centers on yen-denominated bonds, and interest rate risk is somewhat high.

Issuer:	The Kumamoto Bank, Ltd.
Issuer:	The Juhachi-Shinwa Bank, Ltd.
Issuer:	THE FUKUOKA CHUO BANK, LTD.
Rating Publication Date:	December 27, 2024

1

The Symbol, Number, or Score in the Rating Scale used to Denote Credit Rating Categories and Notches and, the Identity of the Obligor or the Identity and a Description of the Security or Money Market Instrument as Required by Paragraph (a)(1)(ii)(A) of Rule 17g-7

- Please see the news release. If the credit rating is a private rating, please see the report for private rating.

2

The version of the procedure or methodology used to determine the credit rating; as Required by Paragraph (a)(1)(ii)(B) of Rule 17g-7

- Please see the news release. If the credit rating is a private rating, please see the report for private rating.

3

The Main Assumptions and Principles used in Constructing the Procedures and Methodologies used to Determine the Credit Rating as Required by Paragraph (a)(1)(ii)(C) of Rule 17g-7

- The credit rating methodology assumes, in principle, to be applied to assess the likelihood of a given debt payment in light of its issuer's condition and business environment, etc. in the relevant future. There is certain limitation, however, in the time horizon that the rating foresees.
- The credit rating methodology assumes, in principle, that the factors posted in the below are particularly important for such likelihood to be determined, and that the rating determination is made by evaluating each of them not only quantitatively but also employing qualitative analyses.

A) Business Bases

The likelihood of a given debt payment is highly conditional to its issuer's business bases - how they can be maintained/ expanded into the future and thereby secure earnings and cash flows in adequacy and in a sustainable way.

B) Financial Grounds and Asset Quality

The likelihood of debt payment is highly dependent on the degree of the issuer's indebtedness and loss absorption capacity in terms of equity capital. Also notable is that a financial institution might see a significant loss of financial grounds as a result of changes in value of the assets under its possession.

C) Liquidity Positions

The likelihood of debt payment is highly dependent on the adequacy of the issuer's cash and other sources of repayment (liquidity positions).

D) Related Parties' Status and Stance of Support/ Assistance for the Issuer

The likelihood of debt payment is affected one way or the other by the issuer's related parties such as parent company, subsidiary, guarantor, and the government of the issuer's business domicile, etc. - by their own conditions and/ or position of support/ assistance for the issuer.

E) Order of Seniority in Debt Payment

The likelihood of debt payment can be different between given debts of the same issuer. The likelihood of debt payment for an individual debt is dependent on the issuer's discretion, and/ or its rank relative to other debts of the same issuer in the order of seniority in principal/ interest payment which is determined by design as financial product or by laws, etc.

4 The Potential Limitations of the Credit Rating as Required by Paragraph (a)(1)(ii)(D) of Rule 17g-7

- The credit rating herewith presented by JCR is its summary opinion with regard to the likelihood of given debt payment and hence not necessarily a perfect representation of such likelihood. The credit rating is not intended to estimate the probability of default or the loss on given default, either.
- The objective of the credit rating herewith presented does not include any concerns other than the likelihood of debt payment, such as risks of price changes, market liquidity, etc.
- The credit rating herewith presented is necessary to be reviewed along with possible changes of the issuer of rated objects in its business performance and/ or circumstances which include regulatory environment, and hence subject to possible alteration.

5 Information on the Uncertainty of the Credit Rating as Required by Paragraph (a)(1)(ii)(E) of Rule 17g-7

- The information used for the determination of credit rating as herewith presented is obtained by JCR from the issuer of rated objects and other sources that JCR trusts in terms of accuracy and reliability but possibly contains errors due to human, non-human or other causes. Consequently, the credit rating determined on the grounds of such information does not constitute, explicitly or implicitly, any representation or warrant of JCR on the information itself or any consequences of its use in terms of accuracy, relevance, timeliness, wholeness, market value, or usefulness for any specific purposes.

6 Use of Due Diligence Services of a Third Party in Taking the Rating Action as Required by Paragraph (a)(1)(ii)(F) of Rule 17g-7

- There is no use of any third-party due diligence service in the determination of the credit rating herewith presented.

7 Use of Servicer or Remittance Reports to Conduct Surveillance of the Credit Rating Required by Paragraph (a)(1)(ii)(G) of Rule 17g-7

- There is no use of any servicer or remittance report to conduct surveillance of the credit rating herewith presented.

8 The Types of Data Relied Upon for the Purpose of Determining the Credit Rating as Required by Paragraph (a)(1)(ii)(H) of Rule 17g-7

- The information posted in the below, which includes data, is used for the determination of the credit rating herewith presented.

A) Audited financial statements presented by the rating stakeholders

B) Explanations of business performance, management plans, etc. presented by the rating stakeholders

9 Overall assessment of the Quality of Information Available and Considered in Determining the Credit Rating as Required by Paragraph (a)(1)(ii)(I) of Rule 17g-7

- JCR holds its basic policies for securing the quality of information as a base of due diligence for the determination of credit ratings. The information used as a base for the determination of credit rating herewith presented satisfies such policies, which include the audit by an independent auditor, the warranty made by the issuer, the publication by the issuer, some independent media or, otherwise, JCR analyst's scrutiny, etc.
- JCR sees no particular weakness in the quality of information used for the determination of the credit rating herewith presented as compared to the information used in other cases of the credit rating for comparable issuers or ratable objects.
- If the credit rating is an Indication, please see the report for Indication.

10 Information Relating to Conflicts of Interest as Required by Paragraph (a)(1)(ii)(J) of Rule 17g-7

- JCR receives payment of compensation for the determination of the credit rating herewith presented from either one of those parties who are issuer, underwriter, depositor or sponsor.
- JCR did not receive in the last fiscal year in the past payment of compensation from THE FUKUOKA CHUO BANK, LTD. for any kind of JCR's service other than the determination of public or private credit rating, such as one in the ancillary business.
- JCR received in the last fiscal year in the past payment of compensation from Fukuoka Financial Group, Inc., THE BANK OF FUKUOKA, LTD., The Kumamoto Bank, Ltd., and The Juhachi-Shinwa Bank, Ltd. for any kind of JCR's service other than the determination of public or private credit rating, such as one in the ancillary business.

11 Explanation or Measure of the Potential Volatility of the Credit Rating as Required by Paragraph (a)(1)(ii)(K) of Rule 17g-7

A) Business Bases

The credit rating is subject to alteration if there is improvement or deterioration of the issuer's business bases, since its revenue, etc. may improve or deteriorate by the change in its business management

policies, clients' preferences, competitive situation, or a technological innovation. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change in the business bases is large.

B) Financial Grounds and Asset Quality

The credit rating is subject to alteration if the issuer increases/ decreases its debt/ capital or vice versa and thereby makes its individual debt payment liability less or more bearable and its loss absorption capacity into the future decreased or increased. Also, the changes in the quality of asset under the issuer's holding may affect the credit rating, since such changes could raise or lower the likelihood of future loss of the issuer's financial grounds. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change in the financial grounds and/ or asset quality is large.

C) Liquidity Positions

The credit rating is subject to alteration if there is a change in the issuer's financial management policy or in the relations with fund procurement sources and the change thereby makes its liquidity positions improve or deteriorate. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change is large.

D) Related Parties' Status and Stance of Support/ Assistance for the Issuer

The credit rating is subject to alteration if there is a change in the issuer's parent company or subsidiary, guarantor or other provider of credit enhancement, or the government of the issuer's business domicile, or other related parties' own conditions and/ or position of support/ assistance for the issuer, and the change thereby makes its business bases, financial grounds and/ or liquidity positions improve or deteriorate, and/ or making the effectiveness of guarantee and other credit enhancement improve or deteriorate. The resultant alteration of the credit rating is usually a notch, with possibility of a few notches if and when the change is large.

E) Order of Seniority in Debt Payment and Non-Payment Forgiven by Contract

The credit rating is subject to alteration if there is a change in the rated debt's status in the order of seniority relative to other debts caused by the improvement/ deterioration of the issuer's financial condition. The resultant alteration of the credit rating is usually a notch, with possibility of a few notches if and when the change is large. Also, in case of the financial products for which non-payment of interest/ principal is contractually permissible, the credit rating is subject to alteration if and when the likelihood of such non-payment is projected to increase or decrease. The resultant alteration of the credit rating could be by a notch but often as much as a few notches.

F) Rise and Fall in General Economy and Markets

The credit rating is subject to alteration if there is a rise/ fall in the general economy and/ or the markets inducing the issuer's revenues/ expenses to increase/ decrease and vice versa, etc. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change is exceptionally large.

G) Various Events

The credit rating is subject to alteration on occurrence of various events, such as change in the issuer's major shareholders, M&A and other organizational change, accident, violation of the law, litigation, legal/ regulatory change, natural disaster, etc., which are unforeseeable at the time when the credit rating is determined, causing a significant change on the issuer's business bases, financial grounds, etc. The resultant alteration of the credit rating could be by a notch but more often than not as much as a few notches.

12

Information on the Content of the Credit Rating, Including the Historical Performance of the Credit Rating and the Expected Probability of Default and the Expected Loss in the Event of Default as Required by Paragraph (a)(1)(ii)(L) of Rule 17g-7

- Historical records of the credit rating herewith presented are posted in the end of this paper.
- The credit rating herewith presented by JCR is its summary opinion with regard to the likelihood of given debt payment and hence not necessarily a perfect representation of such likelihood. The credit rating is not intended to estimate the probability of default or the loss on given default, either.
- Facts of the probability of default are posted as Form NRSRO Exhibit 1 on the JCR website under the URL:

13 Information on the Sensitivity of the Credit Rating to Assumptions Made as Required by Paragraph (a)(1)(ii)(M) of Rule 17g-7

A) Business Bases

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the issuer's business bases and powers of earning or cash flow generation, etc. The resultant change of the credit rating is most likely by a notch, as JCR speculates, but possibly as much as a few notches if the development is rapid in improvement or deterioration of the issuer's business bases on some drastic change in the operational environments, etc.

B) Financial Grounds and Asset Quality

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the issuer's financial grounds and asset quality. The resultant change of the credit rating is most likely by a notch, as JCR speculates, but possibly as much as a few notches if the development is rapid in improvement or deterioration of the issuer's financial grounds and/ or asset quality on some drastic change in its business bases.

C) Liquidity Risks

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the issuer's liquidity positions. The resultant change of the credit rating is most likely by a notch, as JCR speculates, but possibly as much as a few notches if the development is rapid in improvement or deterioration of the issuer's liquidity positions on some drastic change in its financial management policy or relations with fund procurement sources, etc.

D) Related Parties' Status and Stance of Support/ Assistance for the Issuer

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the issuer's parent company or subsidiaries, guarantor or other providers of credit enhancement, the government of the issuer's business domicile or other related parties' status and stance of support/ assistance for the issuer. The resultant change of the credit rating is most likely by a notch, as JCR speculates, but possibly as much as a few notches if there is a major change on the part of related parties, such as replacement, disappearance, some drastic improvement/ deterioration of financial grounds/ balances, etc.

E) Rise and Fall in General Economy and Markets

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the prospects of general economy and markets. JCR expects the change should be most likely by a notch but could be as much as a few notches, should the economy or the markets change so greatly.

14 Information on the Representations, Warranties, and Enforcement Mechanisms of an Asset-backed Security as Required by Paragraph (a)(1)(ii)(N) of rule 17g-7

- The credit rating herewith presented is not for an ABS product, and hence no relevant issue.

THE FUKUOKA CHUO BANK,	Issuer(Long-term)	December 22, 2023	AA-	Stable

Attestation Required by Paragraph (a)(1)(iii) of Rule 17g-7

I, Tomohiro Miyao, have responsibility to this Rating Action and to the best of my knowledge:

- A) No part of the credit rating was influenced by any other business activities.
- B) The credit rating was based solely upon the merits of the obligor, security, or money market instrument being rated.
- C) The credit rating was an independent evaluation of the credit risk of the obligor, security, or money market instrument.

宮尾 知浩

Tomohiro Miyao
General Manager of Financial Institution Rating Department
