SAIBU GAS HOLDINGS CO., LTD.	9536	<Affirmation>	J-1+

(See page 5 and beyond for details about ratings on individual bonds, etc.)

Rating Viewpoints

- (1) Having reviewed the ratings on city gas companies (collectively, the "Companies"): TOKYO GAS CO., LTD., OSAKA GAS CO., LTD., TOHO GAS CO., LTD., HOKKAIDO GAS CO., LTD., HIROSHIMA GAS CO., LTD. and SAIBU GAS HOLDINGS CO., LTD. ("SAIBU GAS HD"), JCR affirmed the ratings and retained the Stable outlook for all of the Companies. JCR also maintains its view that the Companies have stable business bases under government regulations and protection. Gas system reforms are now taking root, and institutional uncertainty has receded. JCR will continue to base rating decisions on the assessment of the industry as a whole going forward, too, to be reflected in the ratings with company-specific trends also taken into consideration.
- (2) The earnings capacity of the city gas business is stable. Sales volume remains largely unchanged for individual companies and will likely be maintained at a solid level on the whole as a gradual decline in residential demand will be offset by fuel conversion demand in the industrial sector. As regards the trends toward decarbonization, corporate mindset has in recent years shifted from taking radical measures to making an energy transition that prioritizes practicality, both domestically and internationally, and thus natural gas is being re-evaluated as a low-carbon fuel. In terms of costs, the institutional framework supports the stability of business operations. The gas resource cost adjustment system provides a mechanism whereby the impact of fluctuations in gas resource prices on profitability is nearly offset after a certain period of time, on top of which the full cost principle is applied to the gas pipeline business. Looking ahead, however, decarbonizing gas itself will be a key management issue. Major companies in particular are advancing studies on large-scale e-methane production projects overseas, and JCR will keep an eye on their progress, as well as the scale of investment and profitability.

- (3) LNG procurement is stable for all of the Companies, primarily under long-term contracts. There are no particular obstacles to LNG imports from Russia. Even so, the outlook for the Russia-Ukraine situation continues to be uncertain, and there remain medium- to long-term procurement risks. Hence, efforts to diversify suppliers and increase flexibility in contract terms will continue to be critical going forward, too. In particular, companies highly dependent on specific regions require a closer watch. On a separate note, given low dependence on the Middle East for LNG procurement, JCR considers the quantitative impact of the closure of the Strait of Hormuz to be limited.
- (4) While competition in the retail electricity market is beginning to intensify again, the Companies are steadily expanding their customer bases. At the same time, it should also be noted that differences in procurement costs are prone to arise amid increasing volatility in wholesale electricity market prices because of the deteriorating Middle East situation. The Companies are working to mitigate any impact by optimizing their power source portfolios, including the expansion of their own power sources, and JCR will watch the outcome of these efforts. Furthermore, some of them are expanding their involvement in the LNG value chain through such initiatives as shale gas development and LNG trading, thereby diversifying their earnings sources. While these efforts contribute to broadening the earnings base, they carry higher risks than the city gas business, making appropriate management essential.
- (5) On the financial front, there are moves to expand investments and shareholder returns for future growth, and thus interest-bearing debt is trending upward across the board. JCR assumes that the Companies will maintain a certain level of financial discipline into the future, but the financial position, pace of investment expansion and level of shareholder returns vary among them, requiring attention to how far their respective financial positions will be affected.

Rationale

Issuer: TOKYO GAS CO., LTD.

<Affirmation>

Long-term Issuer Rating: AAAP

Outlook: Stable

- (1) TOKYO GAS is Japan's largest city gas company serving the Tokyo metropolitan area. Operating its business consistently from feedstock procurement to sales, it enjoys a solid business base and strong competitiveness as the industry's leader. It also focuses on businesses other than city gas, including electricity, services and overseas, and has strong presence among power producers and suppliers in terms of retail electricity sales.
- (2) TOKYO GAS boasts the industry's top-class earnings capacity. It maintains a solid business base in the city gas business and is acquiring customers in the electricity business thanks to a stable procurement base. It has also been expanding profit contribution from overseas operations in recent years. While it needs to address the susceptibility of the North American shale gas business to market fluctuations, it is working to stabilize earnings by, for instance, leveraging hedging transactions. On the financial front, it is expanding investments and shareholder returns but is committed to do so under a certain level of discipline, and thus JCR assumes that financial soundness will be maintained into the future. Based on the above, JCR affirmed the rating on TOKYO GAS with Stable outlook.
- (3) Balance between investment and financial soundness continues to be a key focus. The asset size of the overseas business, which carries relatively high business risk, is tending to expand, thus requiring disciplined financial management more than ever. JCR will watch whether TOKYO GAS can secure investment capacity as planned through such measures as the expansion of operating cash flow and capital recycling.

Issuer: OSAKA GAS CO., LTD.

<Affirmation>

Long-term Issuer Rating: AA+p

Outlook: Stable

- (1) OSAKA GAS is Japan's second largest city gas company serving six prefectures in the Kinki region as well as Okayama Prefecture. It operates its business consistently from feedstock procurement to sales and enjoys a solid business base. While mainly operating the gas business, it also engages in the electricity, international energy, life & business solutions ("LBS") and other businesses.

- (2) OSAKA GAS has high earnings capacity in the industry. It maintains a solid business base in the city gas business. In the electricity business, it is making progress in customer acquisition and will likely improve cost competitiveness going forward with the launch of the Himeji Natural Gas Power Plant. Moreover, it is expanding the earnings base while mitigating market volatility risks in the international energy business and keeps attaining stable profits in the LBS business. On the financial front, it is expanding investments and shareholder returns but maintains its stance to focus on financial discipline. Therefore, financial soundness will likely be maintained into the future. Based on the above, JCR affirmed the rating on OSAKA GAS with Stable outlook.
- (3) OSAKA GAS is actively pursuing investments, primarily in the international energy business, and is expected to expand investment in carbon-neutral areas in the future, including the development of e-methane projects. JCR assumes that such investments will be made under a certain level of financial discipline, but continued attention should be paid to see whether OSAKA GAS can secure sufficient investment capacity through operating cash flow and asset replacement and how it will raise funds in case additional investment becomes necessary.

Issuer: TOHO GAS CO., LTD.

<Affirmation>

Long-term Issuer Rating: AA+p
Outlook: Stable

- (1) TOHO GAS is Japan's third largest city gas company serving parts of Aichi, Gifu and Mie prefectures, centering on Nagoya City. Its service area is one of Japan's three major metropolitan areas and thus has large demand. As it includes the Chukyo industrial zone, the ratio of industrial gas sales, especially to automotive-related industries, is high. TOHO GAS in recent years has been shifting away from the conventional business structure centered on city gas and LPG and is now allocating management resources intensively to strategic businesses such as electricity and overseas.
- (2) TOHO GAS's earnings capacity is highly stable. Business bases for mainstay city gas and LPG remain largely unchanged, and robust performance is expected to continue into the near future. In the electricity business, too, the risk of a sharp drop in profits appears to have been mitigated thanks to the measures taken to reduce and stabilize procurement costs. On the financial front, however, TOHO GAS is accelerating shareholder returns, which suggests that the financial structure will weaken going forward. That said, as it sets such targets as an equity capital of around 400 billion yen and D/E ratio of no greater than 0.8x, it will likely maintain a certain level of financial soundness. Based on the above, JCR affirmed the rating on TOHO GAS with Stable outlook.
- (3) Looking ahead, JCR will keep an eye on the outcome of investments in strategic businesses. As TOHO GAS is expanding investments in strategic businesses while reducing equity capital, it faces the vital challenge of always generating returns from these investments to ensure financial soundness. As regards the electricity business, attention will be paid to the effectiveness of risk mitigation measures.

Issuer: HOKKAIDO GAS CO., LTD.

<Affirmation>

Long-term Issuer Rating: A+
Outlook: Stable
Bonds: A+
Shelf Registration: Preliminary A+
CP: J-1

- (1) HOKKAIDO GAS is a city gas company mainly serving Sapporo, Otaru, Chitose, Hakodate and Kitami and holds a leading position in the industry in Hokkaido. In its service areas, there is significant potential demand thanks to fuel conversion from kerosene; moreover, residential gas is high in the demand mix because of regional characteristics. HOKKAIDO GAS is also working to strengthen its own power sources and has power plants in places like the Ishikari LNG terminal and the basement of the head office.
- (2) HOKKAIDO GAS has been faring well and will probably maintain robust performance into the future. It has a solid business base in Hokkaido and is boosting the volume of gas sales while absorbing fuel conversion demand. In the electricity business, it has a stable power source portfolio by leveraging its own power sources, thereby attaining solid profits. On the financial front, it is making progress in

building up profits and reducing interest-bearing debt, and its financial position is steadily improving. Based on the above, JCR affirmed the ratings on HOKKAIDO GAS and retained the Stable outlook.

- (3) HOKKAIDO GAS is considering the construction of a new LNG terminal and may incur a considerable level of financial burden, depending on its future investment decisions. Hence, steadily securing financial capacity is vital. Moreover, as competition in Hokkaido's gas and electricity markets is expected to intensify further, JCR will watch how HOKKAIDO GAS will address the challenge.

Issuer: HIROSHIMA GAS CO., LTD.

<Affirmation>

Long-term Issuer Rating: A
Outlook: Stable
Bonds: A
CP: J-1

- (1) HIROSHIMA GAS is the Chugoku region's largest city gas company serving the cities of Hiroshima, Kure, Onomichi, Mihara, Hatsukaichi, Higashihiroshima and so forth. It has strong presence mainly in western Hiroshima Prefecture, including its LPG subsidiaries. With wide-ranging industrial clusters in its service areas, industrial gas accounts for more than 50% in the demand mix. Defining the electricity business as a new pillar of its growth strategy, it has been working to develop renewable energy power sources and expand sales areas in recent years.
- (2) HIROSHIMA GAS's performance is somewhat sluggish, but the good financial position underpins creditworthiness. The volume of gas sales has been on the decline due in part to the withdrawal of large customers, but such decline is now slowing down. Moreover, as a raise in city gas rates has been announced, overall performance is expected to improve going forward. As regards LNG procurement, even though HIROSHIMA GAS heavily relies on the Sakhalin-2 project, this poses no operational issues as of now, and multiple alternative procurement means are being secured. Financial structure is good. Given the investment plan and cash flow generation capacity, HIROSHIMA GAS will probably be able to maintain the current level of financial position into the future. Based on the above, JCR affirmed the ratings on HIROSHIMA GAS and retained the Stable outlook.
- (3) HIROSHIMA GAS faces the challenge of recovering gas sales volume by absorbing fuel conversion demand. Whether it can develop the electricity business into a new earnings source will also be watched. As regards LNG procurement, with the contract for the Sakhalin-2 project nearing expiration, JCR will keep an eye on progress in the response measures going forward.

Issuer: SAIBU GAS HOLDINGS CO., LTD.

<Affirmation>

Long-term Issuer Rating: AA-
Outlook: Stable
Bonds: AA-
Shelf Registration: Preliminary AA-
CP: J-1+

- (1) SAIBU GAS HD is the pure holding company of the Saibu Gas Group (the "Group"), a major city gas group serving Fukuoka, Kitakyushu, Kumamoto, Nagasaki and other areas. Given its strong unity with operating subsidiaries under its umbrella in terms of management, financing, capital, etc., JCR incorporates the Group's overall creditworthiness in SAIBU GAS HD's ratings. City gas demand in the Group's service areas is large, and stable and highly profitable residential gas accounts for a relatively high proportion in the demand mix. The Group also operates the electricity, real estate, food-related and other businesses.
- (2) SAIBU GAS HD has solid earnings capacity. It has been achieving a stable volume of city gas sales while securing a certain level of profits in the real estate business. In the electricity business, sales volume has been growing, and cost competitiveness is expected to improve with the launch of Hibiki Power Plant. On the financial front, aggressive growth investments, centering on capacity enhancement at the Hibiki LNG terminal, are anticipated, but SAIBU GAS HD intends to make such investments under a certain level of financial discipline and is thus likely to be able to maintain the current level of financial structure. Based on the above, JCR affirmed the ratings on SAIBU GAS HD and retained the Stable outlook.

(3) Financial structure leaves room for improvement. As a high level of capital expenditures are expected to continue over the medium to long term, ongoing attention will be paid to see whether SAIBU GAS HD can avoid the deterioration of the financial structure by taking such measures as expanding operating cash flow and divesting assets. For No. 3 LNG tank scheduled to commence operations in FY2029, JCR will keep an eye on progress in SAIBU GAS HD's efforts to absorb demand with an aim to recover investments.

The assumptions for the credit ratings and the definitions of the rating symbols are published as "Types of Credit Ratings and Definitions of Rating Symbols" (January 6, 2014) in Information about JCR Ratings on JCR's website (<https://www.jcr.co.jp/en/>).

Outline of the rating methodology is shown as "JCR's Rating Methodology" (October 1, 2024), "City Gas" (June 15, 2022) and "Rating Methodology for a Holding Company" (April 2, 2025) in Information about JCR Ratings on JCR's website (<https://www.jcr.co.jp/en/>).

The aforementioned credit ratings of TOKYO GAS CO., LTD., OSAKA GAS CO., LTD. and TOHO GAS CO., LTD. are unsolicited. Except in cases of a credit rating for a sovereign, JCR indicates affix "p" after a rating symbol to distinguish it from a rating with solicitation. The undisclosed information, which has material influence on the credit rating, was obtained from the rating stakeholder.

The rating stakeholder participated in the rating process of the aforementioned credit ratings.

A preliminary rating is a credit rating assigned as a preliminary evaluation while material terms for issue to be rated are not yet finalized. When the issuing terms are finalized, JCR will confirm them and will assign a credit rating anew. The rating level of the final rating may be different from that of the preliminary rating, depending on the final content of the terms, etc.

JCR's ratings and credit assessments are statements of JCR's current and comprehensive opinion regarding redemption possibility, etc. of financial obligations assumed by the issuers or financial products, and not statements of opinion regarding any risk other than credit risk, such as market liquidity risk or price fluctuation risk. JCR's ratings and credit assessments are statements of opinion, and not statements of fact as to credit risk decisions or recommendations regarding decisions to purchase, sell or hold any securities such as individual bonds or commercial paper. The ratings and credit assessments may be changed, suspended or withdrawn as a result of changes in or unavailability of information as well as other factors. JCR receives a rating fee paid by issuers for conducting rating services in principle. JCR retains all rights pertaining to this document, including JCR's rating data. Any reproduction, adaptation, alteration, etc. of this document, including such rating data, is prohibited, whether or not wholly or partly, without prior consent of JCR.

JCR is registered as a "Nationally Recognized Statistical Rating Organization" with the U.S. Securities and Exchange Commission with respect to the following four classes. (1) Financial institutions, brokers and dealers, (2) Insurance Companies, (3) Corporate Issuers, (4) Issuers of government securities, municipal securities and foreign government securities.

JCR publishes its press releases regarding the rating actions both in Japanese and in English on the same day. In case that it takes time to translate rating rationale, JCR may publicize the summary version, which will be replaced by the full translated version within three business days. (Regarding Structured Finance products, JCR only publicize the summary version in English.)

INFORMATION DISCLOSURE FORM

Japan Credit Rating Agency, Ltd.

Disclosure Required by Paragraph (a)(1)(ii) of Rule 17g-7

Issuer:	TOKYO GAS CO.,LTD. OSAKA GAS CO.,LTD. TOHO GAS CO., LTD.
Rating Publication Date:	May 29, 2026

1

The Symbol, Number, or Score in the Rating Scale used to Denote Credit Rating Categories and Notches and, the Identity of the Obligor or the Identity and a Description of the Security or Money Market Instrument as Required by Paragraph (a)(1)(ii)(A) of Rule 17g-7

- Please see the news release. If the credit rating is a private rating, please see the report for private rating.

2

The version of the procedure or methodology used to determine the credit rating; as Required by Paragraph (a)(1)(ii)(B) of Rule 17g-7

- Please see the news release. If the credit rating is a private rating, please see the report for private rating.

3

The Main Assumptions and Principles used in Constructing the Procedures and Methodologies used to Determine the Credit Rating as Required by Paragraph (a)(1)(ii)(C) of Rule 17g-7

- The credit rating methodology assumes, in principle, to be applied to assess the likelihood of a given debt payment in light of its issuer's condition and business environment, etc. in the relevant future. There is certain limitation, however, in the time horizon that the rating foresees.
- The credit rating methodology assumes, in principle, that the factors posted in the below are particularly important for such likelihood to be determined, and that the rating determination is made by evaluating each of them not only quantitatively but also employing qualitative analyses.

A) Business Bases

The likelihood of a given debt payment is highly conditional to its issuer's business bases - how they can be maintained/ expanded into the future and thereby secure earnings and cash flows in adequacy and in a sustainable way.

B) Financial Grounds and Asset Quality

The likelihood of debt payment is highly dependent on the degree of the issuer's indebtedness and loss absorption capacity in terms of equity capital. Also notable is that a financial institution might see a significant loss of financial grounds as a result of changes in value of the assets under its possession.

C) Liquidity Positions

The likelihood of debt payment is highly dependent on the adequacy of the issuer's cash and other sources of repayment (liquidity positions).

D) Related Parties' Status and Stance of Support/ Assistance for the Issuer

The likelihood of debt payment is affected one way or the other by the issuer's related parties such as parent company, subsidiary, guarantor, and the government of the issuer's business domicile, etc. - by their own conditions and/ or position of support/ assistance for the issuer.

E) Order of Seniority in Debt Payment

The likelihood of debt payment can be different between given debts of the same issuer. The likelihood of debt payment for an individual debt is dependent on the issuer's discretion, and/ or its rank relative to other debts of the same issuer in the order of seniority in principal/ interest payment which is determined by design as financial product or by laws, etc.

4 The Potential Limitations of the Credit Rating as Required by Paragraph (a)(1)(ii)(D) of Rule 17g-7

- The credit rating herewith presented by JCR is its summary opinion with regard to the likelihood of given debt payment and hence not necessarily a perfect representation of such likelihood. The credit rating is not intended to estimate the probability of default or the loss on given default, either.
- The objective of the credit rating herewith presented does not include any concerns other than the likelihood of debt payment, such as risks of price changes, market liquidity, etc.
- The credit rating herewith presented is necessary to be reviewed along with possible changes of the issuer of rated objects in its business performance and/ or circumstances which include regulatory environment, and hence subject to possible alteration.

5 Information on the Uncertainty of the Credit Rating as Required by Paragraph (a)(1)(ii)(E) of Rule 17g-7

- The information used for the determination of credit rating as herewith presented is obtained by JCR from the issuer of rated objects and other sources that JCR trusts in terms of accuracy and reliability but possibly contains errors due to human, non-human or other causes. Consequently, the credit rating determined on the grounds of such information does not constitute, explicitly or implicitly, any representation or warrant of JCR on the information itself or any consequences of its use in terms of accuracy, relevance, timeliness, wholeness, market value, or usefulness for any specific purposes.

6 Use of Due Diligence Services of a Third Party in Taking the Rating Action as Required by Paragraph (a)(1)(ii)(F) of Rule 17g-7

- There is no use of any third-party due diligence service in the determination of the credit rating herewith presented.

7 Use of Servicer or Remittance Reports to Conduct Surveillance of the Credit Rating Required by Paragraph (a)(1)(ii)(G) of Rule 17g-7

- There is no use of any servicer or remittance report to conduct surveillance of the credit rating herewith presented.

8 The Types of Data Relied Upon for the Purpose of Determining the Credit Rating as Required by Paragraph (a)(1)(ii)(H) of Rule 17g-7

- The information posted in the below, which includes data, is used for the determination of the credit rating herewith presented.

A) Audited financial statements presented by the rating stakeholders

B) Explanations of business performance, management plans, etc. presented by the rating stakeholders

9 Overall assessment of the Quality of Information Available and Considered in Determining the Credit Rating as Required by Paragraph (a)(1)(ii)(I) of Rule 17g-7

- JCR holds its basic policies for securing the quality of information as a base of due diligence for the determination of credit ratings. The information used as a base for the determination of credit rating herewith presented satisfies such policies, which include the audit by an independent auditor, the warranty made by the issuer, the publication by the issuer, some independent media or, otherwise, JCR analyst's scrutiny, etc.
- JCR sees no particular weakness in the quality of information used for the determination of the credit rating herewith presented as compared to the information used in other cases of the credit rating for comparable issuers or ratable objects.
- If the credit rating is an Indication, please see the report for Indication.

10 Information Relating to Conflicts of Interest as Required by Paragraph (a)(1)(ii)(J) of Rule 17g-7

- JCR does not receive payment of compensation for the determination of the credit rating herewith presented from either one of those parties who are issuer, underwriter, depositor or sponsor.
- JCR did not receive in the last fiscal year in the past payment of compensation from the same party for any kind of JCR's service other than the determination of public or private credit rating, such as one in the ancillary business.

11 Explanation or Measure of the Potential Volatility of the Credit Rating as Required by Paragraph (a)(1)(ii)(K) of Rule 17g-7

A) Business Bases

The credit rating is subject to alteration if there is improvement or deterioration of the issuer's business bases, since its revenue, etc. may improve or deteriorate by the change in its business management policies, clients' preferences, competitive situation, or a technological innovation. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change in the business bases is large.

B) Financial Grounds and Asset Quality

The credit rating is subject to alteration if the issuer increases/ decreases its debt/ capital or vice versa and thereby makes its individual debt payment liability less or more bearable and its loss absorption capacity into the future decreased or increased. Also, the changes in the quality of asset under the issuer's holding may affect the credit rating, since such changes could raise or lower the likelihood of future loss of the issuer's financial grounds. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change in the financial grounds and/ or asset quality is large.

C) Liquidity Positions

The credit rating is subject to alteration if there is a change in the issuer's financial management policy or in the relations with fund procurement sources and the change thereby makes its liquidity positions improve or deteriorate. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change is large.

D) Related Parties' Status and Stance of Support/ Assistance for the Issuer

The credit rating is subject to alteration if there is a change in the issuer's parent company or subsidiary, guarantor or other provider of credit enhancement, or the government of the issuer's business domicile, or other related parties' own conditions and/ or position of support/ assistance for the issuer, and the change thereby makes its business bases, financial grounds and/ or liquidity positions improve or deteriorate, and/ or making the effectiveness of guarantee and other credit enhancement improve or deteriorate. The resultant alteration of the credit rating is usually a notch, with possibility of a few notches if and when the change is large.

E) Order of Seniority in Debt Payment and Non-Payment Forgiven by Contract

The credit rating is subject to alteration if there is a change in the rated debt's status in the order of seniority relative to other debts caused by the improvement/ deterioration of the issuer's financial condition. The resultant alteration of the credit rating is usually a notch, with possibility of a few notches if and when the change is large. Also, in case of the financial products for which non-payment of interest/ principal is contractually permissible, the credit rating is subject to alteration if and when the likelihood of such non-payment is projected to increase or decrease. The resultant alteration of the credit rating could be by a notch but often as much as a few notches.

F) Rise and Fall in General Economy and Markets

The credit rating is subject to alteration if there is a rise/ fall in the general economy and/ or the markets inducing the issuer's revenues/ expenses to increase/ decrease and vice versa, etc. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change is exceptionally large.

G) Various Events

The credit rating is subject to alteration on occurrence of various events, such as change in the issuer's major shareholders, M&A and other organizational change, accident, violation of the law, litigation, legal/ regulatory change, natural disaster, etc., which are unforeseeable at the time when the credit rating is determined, causing a significant change on the issuer's business bases, financial grounds, etc. The resultant alteration of the credit rating could be by a notch but more often than not as much as a few notches.

12

Information on the Content of the Credit Rating, Including the Historical Performance of the Credit Rating and the Expected Probability of Default and the Expected Loss in the Event of Default as Required by Paragraph (a)(1)(ii)(L) of Rule 17g-7

- Historical records of the credit rating herewith presented are posted in the end of this paper.
- The credit rating herewith presented by JCR is its summary opinion with regard to the likelihood of given debt payment and hence not necessarily a perfect representation of such likelihood. The credit rating is not intended to estimate the probability of default or the loss on given default, either.
- Facts of the probability of default are posted as Form NRSRO Exhibit 1 on the JCR website under the URL:

<https://www.jcr.co.jp/en/service/company/regu/nrsro/>

13

Information on the Sensitivity of the Credit Rating to Assumptions Made as Required by Paragraph (a)(1)(ii)(M) of Rule 17g-7

A) Business Bases

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the issuer's business bases and powers of earning or cash flow generation, etc. The resultant change of the credit rating is most likely by a notch, as JCR speculates, but possibly as much as a few notches if the development is rapid in improvement or deterioration of the issuer's business bases on some drastic change in the operational environments, etc.

B) Financial Grounds and Asset Quality

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the issuer's financial grounds and asset quality. The resultant change of the credit rating is most likely by a notch, as JCR speculates, but

possibly as much as a few notches if the development is rapid in improvement or deterioration of the issuer's financial grounds and/ or asset quality on some drastic change in its business bases.

C) Liquidity Risks

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the issuer's liquidity positions. The resultant change of the credit rating is most likely by a notch, as JCR speculates, but possibly as much as a few notches if the development is rapid in improvement or deterioration of the issuer's liquidity positions on some drastic change in its financial management policy or relations with fund procurement sources, etc.

D) Order of Seniority in Debt Payment and Non-Payment Forgiven by Contract

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the order of seniority in repayment of interests and principal. JCR assumes the resultant change of the credit rating is most likely by a notch. The change could be as much as a few notches if the issuer's financial structure differs so much and thereby the balance between debts shifted so greatly. Rating change is also possible in case of the financial products for which non-payment of interest/ principal is contractually permissible, if and when the assumptions made at the time of its determination turns out to be inaccurate. The change of the credit rating is assumed to be by a notch but often as much as a few notches.

E) Rise and Fall in General Economy and Markets

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the prospects of general economy and markets. JCR expects the change should be most likely by a notch but could be as much as a few notches, should the economy or the markets change so greatly.

14

Information on the Representations, Warranties, and Enforcement Mechanisms of an Asset-backed Security as Required by Paragraph (a)(1)(ii)(N) of rule 17g-7

- The credit rating herewith presented is not for an ABS product, and hence no relevant issue.

Attestation Required by Paragraph (a)(1)(iii) of Rule 17g-7

I, Masayoshi Mizukawa, have responsibility to this Rating Action and to the best of my knowledge:

- A) No part of the credit rating was influenced by any other business activities.
- B) The credit rating was based solely upon the merits of the obligor, security, or money market instrument being rated.
- C) The credit rating was an independent evaluation of the credit risk of the obligor, security, or money market instrument.

水川 雅義

Masayoshi Mizukawa

INFORMATION DISCLOSURE FORM

Japan Credit Rating Agency, Ltd.

Disclosure Required by Paragraph (a)(1)(ii) of Rule 17g-7

Issuer:	HOKKAIDO GAS CO., LTD. HIROSHIMA GAS CO., LTD. SAIBU GAS HOLDINGS CO., LTD.
Rating Publication Date:	May 29, 2026

1

The Symbol, Number, or Score in the Rating Scale used to Denote Credit Rating Categories and Notches and, the Identity of the Obligor or the Identity and a Description of the Security or Money Market Instrument as Required by Paragraph (a)(1)(ii)(A) of Rule 17g-7

- Please see the news release. If the credit rating is a private rating, please see the report for private rating.

2

The version of the procedure or methodology used to determine the credit rating; as Required by Paragraph (a)(1)(ii)(B) of Rule 17g-7

- Please see the news release. If the credit rating is a private rating, please see the report for private rating.

3

The Main Assumptions and Principles used in Constructing the Procedures and Methodologies used to Determine the Credit Rating as Required by Paragraph (a)(1)(ii)(C) of Rule 17g-7

- The credit rating methodology assumes, in principle, to be applied to assess the likelihood of a given debt payment in light of its issuer's condition and business environment, etc. in the relevant future. There is certain limitation, however, in the time horizon that the rating foresees.
- The credit rating methodology assumes, in principle, that the factors posted in the below are particularly important for such likelihood to be determined, and that the rating determination is made by evaluating each of them not only quantitatively but also employing qualitative analyses.

A) Business Bases

The likelihood of a given debt payment is highly conditional to its issuer's business bases - how they can be maintained/ expanded into the future and thereby secure earnings and cash flows in adequacy and in a sustainable way.

B) Financial Grounds and Asset Quality

The likelihood of debt payment is highly dependent on the degree of the issuer's indebtedness and loss absorption capacity in terms of equity capital. Also notable is that a financial institution might see a significant loss of financial grounds as a result of changes in value of the assets under its possession.

C) Liquidity Positions

The likelihood of debt payment is highly dependent on the adequacy of the issuer's cash and other sources of repayment (liquidity positions).

D) Related Parties' Status and Stance of Support/ Assistance for the Issuer

The likelihood of debt payment is affected one way or the other by the issuer's related parties such as parent company, subsidiary, guarantor, and the government of the issuer's business domicile, etc. - by their own conditions and/ or position of support/ assistance for the issuer.

E) Order of Seniority in Debt Payment

The likelihood of debt payment can be different between given debts of the same issuer. The likelihood of debt payment for an individual debt is dependent on the issuer's discretion, and/ or its rank relative to other debts of the same issuer in the order of seniority in principal/ interest payment which is determined by design as financial product or by laws, etc.

4 The Potential Limitations of the Credit Rating as Required by Paragraph (a)(1)(ii)(D) of Rule 17g-7

- The credit rating herewith presented by JCR is its summary opinion with regard to the likelihood of given debt payment and hence not necessarily a perfect representation of such likelihood. The credit rating is not intended to estimate the probability of default or the loss on given default, either.
- The objective of the credit rating herewith presented does not include any concerns other than the likelihood of debt payment, such as risks of price changes, market liquidity, etc.
- The credit rating herewith presented is necessary to be reviewed along with possible changes of the issuer of rated objects in its business performance and/ or circumstances which include regulatory environment, and hence subject to possible alteration.

5 Information on the Uncertainty of the Credit Rating as Required by Paragraph (a)(1)(ii)(E) of Rule 17g-7

- The information used for the determination of credit rating as herewith presented is obtained by JCR from the issuer of rated objects and other sources that JCR trusts in terms of accuracy and reliability but possibly contains errors due to human, non-human or other causes. Consequently, the credit rating determined on the grounds of such information does not constitute, explicitly or implicitly, any representation or warrant of JCR on the information itself or any consequences of its use in terms of accuracy, relevance, timeliness, wholeness, market value, or usefulness for any specific purposes.

6 Use of Due Diligence Services of a Third Party in Taking the Rating Action as Required by Paragraph (a)(1)(ii)(F) of Rule 17g-7

- There is no use of any third-party due diligence service in the determination of the credit rating herewith presented.

7 Use of Servicer or Remittance Reports to Conduct Surveillance of the Credit Rating Required by Paragraph (a)(1)(ii)(G) of Rule 17g-7

- There is no use of any servicer or remittance report to conduct surveillance of the credit rating herewith presented.

8 The Types of Data Relied Upon for the Purpose of Determining the Credit Rating as Required by Paragraph (a)(1)(ii)(H) of Rule 17g-7

- The information posted in the below, which includes data, is used for the determination of the credit rating herewith presented.

A) Audited financial statements presented by the rating stakeholders

B) Explanations of business performance, management plans, etc. presented by the rating stakeholders

9 Overall assessment of the Quality of Information Available and Considered in Determining the Credit Rating as Required by Paragraph (a)(1)(ii)(I) of Rule 17g-7

- JCR holds its basic policies for securing the quality of information as a base of due diligence for the determination of credit ratings. The information used as a base for the determination of credit rating herewith presented satisfies such policies, which include the audit by an independent auditor, the warranty made by the issuer, the publication by the issuer, some independent media or, otherwise, JCR analyst's scrutiny, etc.
- JCR sees no particular weakness in the quality of information used for the determination of the credit rating herewith presented as compared to the information used in other cases of the credit rating for comparable issuers or ratable objects.
- If the credit rating is an Indication, please see the report for Indication.

10 Information Relating to Conflicts of Interest as Required by Paragraph (a)(1)(ii)(J) of Rule 17g-7

- JCR receives payment of compensation for the determination of the credit rating herewith presented from either one of those parties who are issuer, underwriter, depositor or sponsor.
- JCR did not receive in the last fiscal year in the past payment of compensation from the same party for any kind of JCR's service other than the determination of public or private credit rating, such as one in the ancillary business.

11 Explanation or Measure of the Potential Volatility of the Credit Rating as Required by Paragraph (a)(1)(ii)(K) of Rule 17g-7

A) Business Bases

The credit rating is subject to alteration if there is improvement or deterioration of the issuer's business bases, since its revenue, etc. may improve or deteriorate by the change in its business management policies, clients' preferences, competitive situation, or a technological innovation. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change in the business bases is large.

B) Financial Grounds and Asset Quality

The credit rating is subject to alteration if the issuer increases/ decreases its debt/ capital or vice versa and thereby makes its individual debt payment liability less or more bearable and its loss absorption capacity into the future decreased or increased. Also, the changes in the quality of asset under the issuer's holding may affect the credit rating, since such changes could raise or lower the likelihood of future loss of the issuer's financial grounds. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change in the financial grounds and/ or asset quality is large.

C) Liquidity Positions

The credit rating is subject to alteration if there is a change in the issuer's financial management policy or in the relations with fund procurement sources and the change thereby makes its liquidity positions improve or deteriorate. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change is large.

D) Related Parties' Status and Stance of Support/ Assistance for the Issuer

The credit rating is subject to alteration if there is a change in the issuer's parent company or subsidiary, guarantor or other provider of credit enhancement, or the government of the issuer's business domicile, or other related parties' own conditions and/ or position of support/ assistance for the issuer, and the change thereby makes its business bases, financial grounds and/ or liquidity positions improve or deteriorate, and/ or making the effectiveness of guarantee and other credit enhancement improve or deteriorate. The resultant alteration of the credit rating is usually a notch, with possibility of a few notches if and when the change is large.

E) Order of Seniority in Debt Payment and Non-Payment Forgiven by Contract

The credit rating is subject to alteration if there is a change in the rated debt's status in the order of seniority relative to other debts caused by the improvement/ deterioration of the issuer's financial condition. The resultant alteration of the credit rating is usually a notch, with possibility of a few notches if and when the change is large. Also, in case of the financial products for which non-payment of interest/ principal is contractually permissible, the credit rating is subject to alteration if and when the likelihood of such non-payment is projected to increase or decrease. The resultant alteration of the credit rating could be by a notch but often as much as a few notches.

F) Rise and Fall in General Economy and Markets

The credit rating is subject to alteration if there is a rise/ fall in the general economy and/ or the markets inducing the issuer's revenues/ expenses to increase/ decrease and vice versa, etc. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change is exceptionally large.

G) Various Events

The credit rating is subject to alteration on occurrence of various events, such as change in the issuer's major shareholders, M&A and other organizational change, accident, violation of the law, litigation, legal/ regulatory change, natural disaster, etc., which are unforeseeable at the time when the credit rating is determined, causing a significant change on the issuer's business bases, financial grounds, etc. The resultant alteration of the credit rating could be by a notch but more often than not as much as a few notches.

12

Information on the Content of the Credit Rating, Including the Historical Performance of the Credit Rating and the Expected Probability of Default and the Expected Loss in the Event of Default as Required by Paragraph (a)(1)(ii)(L) of Rule 17g-7

- Historical records of the credit rating herewith presented are posted in the end of this paper.
- The credit rating herewith presented by JCR is its summary opinion with regard to the likelihood of given debt payment and hence not necessarily a perfect representation of such likelihood. The credit rating is not intended to estimate the probability of default or the loss on given default, either.
- Facts of the probability of default are posted as Form NRSRO Exhibit 1 on the JCR website under the URL:

<https://www.jcr.co.jp/en/service/company/regu/nrsro/>

13

Information on the Sensitivity of the Credit Rating to Assumptions Made as Required by Paragraph (a)(1)(ii)(M) of Rule 17g-7

A) Business Bases

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the issuer's business bases and powers of earning or cash flow generation, etc. The resultant change of the credit rating is most likely by a notch, as JCR speculates, but possibly as much as a few notches if the development is rapid in improvement or deterioration of the issuer's business bases on some drastic change in the operational environments, etc.

B) Financial Grounds and Asset Quality

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the issuer's financial grounds and asset quality. The resultant change of the credit rating is most likely by a notch, as JCR speculates, but

possibly as much as a few notches if the development is rapid in improvement or deterioration of the issuer's financial grounds and/ or asset quality on some drastic change in its business bases.

C) Liquidity Risks

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the issuer's liquidity positions. The resultant change of the credit rating is most likely by a notch, as JCR speculates, but possibly as much as a few notches if the development is rapid in improvement or deterioration of the issuer's liquidity positions on some drastic change in its financial management policy or relations with fund procurement sources, etc.

D) Order of Seniority in Debt Payment and Non-Payment Forgiven by Contract

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the order of seniority in repayment of interests and principal. JCR assumes the resultant change of the credit rating is most likely by a notch. The change could be as much as a few notches if the issuer's financial structure differs so much and thereby the balance between debts shifted so greatly. Rating change is also possible in case of the financial products for which non-payment of interest/ principal is contractually permissible, if and when the assumptions made at the time of its determination turns out to be inaccurate. The change of the credit rating is assumed to be by a notch but often as much as a few notches.

E) Rise and Fall in General Economy and Markets

The credit rating herewith presented could be changed if and when the assumptions made at the time of its determination turn out to be inaccurate with regard to the prospects of general economy and markets. JCR expects the change should be most likely by a notch but could be as much as a few notches, should the economy or the markets change so greatly.

14

Information on the Representations, Warranties, and Enforcement Mechanisms of an Asset-backed Security as Required by Paragraph (a)(1)(ii)(N) of rule 17g-7

- The credit rating herewith presented is not for an ABS product, and hence no relevant issue.

Attestation Required by Paragraph (a)(1)(iii) of Rule 17g-7

I, Masayoshi Mizukawa, have responsibility to this Rating Action and to the best of my knowledge:

- A) No part of the credit rating was influenced by any other business activities.
- B) The credit rating was based solely upon the merits of the obligor, security, or money market instrument being rated.
- C) The credit rating was an independent evaluation of the credit risk of the obligor, security, or money market instrument.

水川 雅義
