Japan Credit Rating Agency, Ltd. (JCR) announces the following credit rating.

## Japan Metropolitan Fund Investment Corporation (security code: 8953)

#### <Affirmation>

Long-term Issuer Rating:	AA
Outlook:	Stable
Bonds:	AA

#### Rationale

- (1) Japan Metropolitan Fund Investment Corporation ("JMF") is a diversified J-REIT sponsored by KKR (KKR & Co. Inc. and the subsidiaries). Its asset manager is KJR Management. Under the vision of "Support metropolitan life (live, work and consume) in Japan from the perspective of real estate," JMF primarily invests in retail facilities, offices, residences and hotels, as well as mixed-use facilities having these functions, located in urban areas. Its portfolio as of the end of December 2024 consisted of 146 properties with a total acquisition price of 1,293.8 billion yen, which is the largest asset size among diversified J-REITs. The percentage by use as of the end of August 2024, based on the acquisition price including private REIT investment units and silent partnership interests, was as follows: urban retail 42.8%, suburban retail 15.5%, office 19.0%, mixed-use 17.6%, residence 4.1% and hotel 1.0%.
- (2) While making a public offering in October 2024 to acquire two urban retail facilities and one mixeduse facility in the Tokyo area and one office property in the Osaka area for a total of 57 billion yen, JMF is also achieving steady progress in asset replacement based on the near-term growth strategy. It can be observed that these initiatives have helped JMF secure higher yields than the acquisition target and large unrealized gains, as well as gains on sales over multiple fiscal periods. In leasing operations, JMF shows a solid track record, with an occupancy rate of 98.6% as of December 31, 2024, NOI yield of 4.4% for the fiscal period ended August 2024, an increase in percentage rent and step rent for retail facilities, mainly urban ones, and rent increases upon tenant replacement or contract renewal, including offices, residences and other properties. Given also the portfolio with the size of over 1 trillion yen and diversified properties and tenants, lease contracts with tenants based mainly on fixed rents and so forth, JCR considers that stable portfolio cash flow can be maintained into the future. On the financial front, sound management is continued, as shown by how leverage is controlled. Based on the above, JCR affirmed the ratings on JMF and retained the Stable outlook.
- (3) Since its merger with MCUBS MidCity Investment Corporation in March 2021, JMF has been working on the asset replacement of 200 billion yen with focus on increasing urban properties and diversifying asset types in the portfolio. It had brought the acquisition price, including the scheduled amount, to 210.3 billion yen as of the end of August 2024, with the transfer price reaching as much as 105.7 billion yen, and plans to continue constant asset replacement going forward, too. JCR is watching how much progress JMF is making in the growth strategy, partly through collaboration with the sponsor, while investing in investment units of private-placement residential REITs, mezzanine loans, silent partnership interests, etc. For internal growth, ongoing attention will be paid to the upgrading of portfolio properties, improvement of the conditions of aging properties and so forth to see trends in investment in individual asset types aimed at profitability improvement.
- (4) Total asset-based book-value LTV as of the end of August 2024 stood at 44.2%, and market-value LTV at 38.0%, which show that the ratio is being controlled within the range assumed by the asset manager. Unrealized gains on the portfolio as a financial buffer as of the same date increased to 206.7 billion yen (unrealized gain ratio: 17.7%). There are no particular concerns about the stability of financing as JMF also has such track records as: maintaining good relations with lenders, centering on MUFG Bank, Ltd.; ensuring liquidity by establishing commitment lines (total borrowing limits: 75 billion yen); staggering repayment dates; and achieving the average remaining debt period of 4.2 years as of the end of August 2024.

  - Please see the news release. If the credit rating is a private rating, please see the report for private rating.
- 3 The Main Assumptions and Principles used in Constructing the Procedures and Methodologies used to Determine the Credit Rating as Required by Paragraph (a)(1)(ii)(C) of Rule 17g-7
  - The credit rating methodology assumes, in principle, to be applied to assess the likelihood of a given debt payment in light of its issuer's condition and market environment, etc. in the relevant future. There is certain limitation, however, in the time horizon that the rating foresees
  - The credit rating methodology assumes, in principle, that the factors posted in the below are particularly important for such likelihood to be determined, and that the rating determination is made by evaluating each of them not only quantitatively but also employing qualitative analyses.
  - A) Portfolios

1

The likelihood of a given debt payment is highly conditional to its issuer's portfolios - how they can be maintained/ enhanced into the future and thereby secure earnings and cash flows in adequacy and in a sustainable way.

B) Financial Grounds and Asset Quality

The likelihood of debt payment is highly dependent on the degree of the issuer's indebtedness and loss absorption capacity in terms of equity capital. Also notable is that a J-REIT might see a significant loss of financial grounds as a result of changes in value of the assets under its possession.

C) Liquidity Positions

The likelihood of debt payment is highly dependent on the adequacy of the issuer's cash and other sources of repayment (liquidity positions) including certainty of refinancing.

D) Related Parties' Status and Stance of Support/ Assistance for the Issuer

The likelihood of debt payment is affected one way or the other by the issuer's related parties such as sponsor, asset manager, guarantor, and the government of the issuer's business domicile, etc. - by their own conditions and/ or position of support/ assistance for the issuer.

E) Order of Seniority in Debt Payment

4

The likelihood of debt payment can be different between given debts of the same issuer. The likelihood of debt payment for an individual debt is dependent on the issuer's discretion, and/ or its rank relative to other debts of the same issuer in the order of seniority in principal/ interest payment which is determined by design as financial product or by laws, etc.

- The Potential Limitations of the Credit Rating as Required by Paragraph (a)(1)(ii)(D) of Rule 17g-7

- The objective of the credit rating herewith presented does not include any concerns other than the likelihood of debt payment, such as risks of price changes, market liquidity, etc.

The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change in the portfolios is large.

B) Financial Grounds and Asset Quality

The credit rating is subject to alteration if the issuer increases/ decreases its debt/ capital or vice versa and thereby makes its individual debt payment liability less or more bearable and its loss absorption capacity into the future decreased or increased. Also, the changes in the quality of asset under the issuer's holding may affect the credit rating, since such changes could raise or lower the likelihood of future loss of the issuer's financial grounds. The resultant alteration of the credit rating is usually by a notch, with possibility of a few notches if and when the change in the financial grounds and/ or asset quality is large.

#### C) Liquidity Positions

The credit rating is subject to alteration if there is a change in the issuer's financial management policy or in the relations with fund procurement sources and the change thereby makes its liquidity positions improve or deteriorate. The resultant alteration of the credit rating is usually a notch, with possibility of a few notches if and when the change is large.

#### E) Order of Seniority in Debt Payment and Non-Payment Forgiven by Contract

The credit rating is subject to alteration if there is a change in the rated debt's status in the order of seniority relative to other debts caused by the improvement/ deterioration of the issuer's financial condition. The resultant alteration of the credit rating is usually a notch, with possibility of a few notches if and when the change is large. Also, in case of the financial products for which non-payment of interest/ principal is contractually permissible, the credit rating is subject to alteration if and when the likelihood of such non-payment is projected to increase or decrease. ## Attestation Required by Paragraph (a)(1)(iii) of Rule 17g7

- I, Yoshinori Namioka, have responsibility to this Rating Action and to the best of my knowledge:
- A) No part of the credit rating was influenced by any other business activities.
- B) The credit rating was based solely upon the merits of the obligor, security, or money market instrument being rated.
- C) The credit rating was an independent evaluation of the credit risk of the obligor, security, or money market instrument.
